To whom it may concern:

K&B Electric approached us about the energy savings and the improved light quality we would see if we changed out our lighting for our current 8' T12 fluorescent lamps to the high efficiency T8 fluorescent lamp lighting. They told us our lighting cost would nearly be cut in half. They came in and replaced all our fixtures to the new T8 fixtures, as an example they used a meter to see what the old amperage was compared to the new ones, and it was half the draw of the old fixtures. Also even though the foot-candles didn't change much the lighting quality improved dramatically. We received a nice rebate from Focus on Energy to help offset the cost of our lighting upgrade. K&B Electric came in and did exactly what they said they would do, the quality of lighting dramatically improved and I saved \$500.00 on the first months electricity bill.

Thank you,

Dale Minten
